

Rafael Alf3rez Robisco

I have a degree in Technical Industrial Engineering, specialized in Mechanical Engineering.

I'm passionate about bringing all kinds of ideas to life for the well-being of people, which is why I love learning a little bit about everything to better understand the big picture of how things work. I'm currently working on deepening my knowledge of computer science, networks, and servers, as well as the services that surround them.

Career

2026 2025	Grupo Portillo Systems Engineer for the technical implementation department.	
	Design, configuration, and deployment of multiservice network infrastructures, CCTV systems, IPTV, VOIP, servers, etc.	
2023	Asea Brown Boveri (ABB) Laboratory technical engineer in the I+D Electrification Research and Development department.	

Education

2025	Degree in Mechanical Engineering from the Universidad Polit3cnica de Madrid	 UNIVERSIDAD POLIT3CNICA DE MADRID
2022	Python Course	
2021	B2 Certificate in English (TOEIC)	
2015	Baccalaureate at Centro Salesiano Santo Domingo Savio	

Highlights

2018 | First prize IFEMA-ETSIDI ideas competition

In 2018 I took part in the ideas competition promoted by IFEMA in conjunction with the ETSIDI of the UPM for the redesign of an electromechanical locking system for the gates of the pavilions of the Feria de Madrid fairgrounds.

After successfully passing the various phases of presentation and exhibition, my project "*Soluci3n al cierre de los portones de guillotina de IFEMA*" was awarded the first prize.
